

KSU – Closing the Food Gap

Ongoing Programs

Kentucky State University
Community Research Service

Organic Agriculture Working Group

- Researchers, teachers, and extension staff work together to develop, evaluate, and demonstrate sustainable agricultural systems compatible with National Organic Program standards.

Aquaculture Research, Teaching and Extension

- KSU's program of distinction supports and promotes a local and sustainable aquaculture industry.

Pawpaw Research

- A native tree fruit diversifies small farm income streams.

Mobile Processing Unit

- An “abattoir on wheels” helps small-scale pasture-based poultry producers meet health regulations.

Organic high tunnels

- A practical approach to providing local food year-round without fossil fuel heat.

Third Thursday Thing

- More than 10 years of free monthly workshops on sustainable agriculture

- organic.kysu.edu/ThirdThursday.html
